## Patina

Pattern In Nature is revealed in Patina's striking simplicity, delivering beauty with performance. The white flecks scattered across the surface are created by the flax content, just as the flowers would appear in the fields from which it is grown. The palette takes its cues from nature and is balanced to include shades which both enhance and blend seamlessly with other fabrics in the Camira portfolio. By allowing its natural beauty to shine through, we've ensured that Patina is truly at home in its new habitat – the office.
